STATE OF CALIFORNIA
CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY
STATE WATER RESOURCES CONTROL BOARD

DIVISION OF WATER RIGHTS

In the Matter of Permits 12947A, 12949, 12950, and 16596
(Applications 12919A, 15736, 15737, and 19351)

Sonoma County Water Agency

ORDER APPROVING CHANGES IN
POINTS OF DIVERSION AND REDIVERSION
AND AMENDING THE PERMIT

SOURCE: (1) East Fork Russian River tributary to Russian River;
(2) Dry Creek tributary to Russian River; and
(3) Russian River
COUNTY: Sonoma and Mendocino

WHEREAS:

1. The State Water Resources Control Board (State Water Board), Division of Water Rights (Division) issued amended Permits 12947A, 12949, 12950 and 16596 pursuant to Applications 12919A, 15736, 15737, and 19351 on September 18, 1986 to the Sonoma County Water Agency (SCWA). The Division issued orders amending these permits on January 4, 1994, May 10, 1994, and January 3, 2006.
2. On May 26, 1998, SCWA filed a petition for change with the State Water Board to allow the SCWA to add Camp Meeker Recreation and Park District and the City of Healdsburg as points of diversion and rediversion.
3. On March 31, 1999, SCWA filed a petition for change with the State Water Board to allow the SCWA to add Collector No. 6 to its Wohler diversion facility as a point of diversion and rediversion.
4. On July 14, 2000, the State Water Board issued public notice of the SCWA petitions. All protests filed against the petitions have been resolved. Protestants Ferrari-Carano Vineyards and Winery; J. Wine Company; Ledbetter Farms; David C. Olson; Prudential Insurance Company of America; River Bend Vineyards, LTD; Joe J. Rochioli, Jr.; Silverado Premium Properties, LLC; and Jeff Webber entered into an agreement with SCWA regarding the prior rights of the protestants. The State Water Board will incorporate the terms of the agreement into SCWA's permits.
5. There is no proposed change in the rate or amount of water or any change in the place or purpose of use. The State Water Resources Control Board has determined that the petitions for change in points of diversion and rediversion do not constitute the initiation of a new right nor operate to the injury of any other lawful user of water.

6. The State Water Board reviewed and considered the information contained in the environmental documents prepared for the project in compliance with the California Environmental Quality Act (CEQA).
 - a. On November 28, 1995, Camp Meeker Recreation and Park District issued a Notice of Determination (NOD) for the Camp Meeker Water System Water Supply Project (SCH # 95103017). The project consists of construction of a new well in Monte Rio, a water transmission pipeline, a treatment plant, a booster pump station, and a terminal storage tank. Camp Meeker Recreation and Park District prepared a Mitigated Negative Declaration and made findings for this project. The Mitigated Negative Declaration identified potentially significant impacts on geology, water, air quality, transportation/circulation, biological resources, hazards, noise, public services, utilities and service systems, aesthetics, and cultural resources. The Camp Meeker Recreation and Park District found that mitigation measures incorporated into the project avoid or reduce potential environmental impacts to less than significant levels.
 - b. On April 16, 1998, The City of Healdsburg issued a NOD for construction of municipal water wells on Dry Creek (SCH # 94103067). The project consists of construction and operation of a new municipal water production well field along Dry Creek, and construction of auxiliary improvements to connect the wells to the city's water system. The City of Healdsburg prepared an Environmental Impact Report (EIR) and made findings for this project. The City of Healdsburg identified potentially significant impacts on earth, air, water, plant life, land use, safety, and utilities. The City of Healdsburg found that mitigation measures incorporated into the project avoid or reduce potential environmental impacts to less than significant.
 - c. On December 15, 1998 the SCWA issued a NOD for Collector No. 6, an element of the Russian River-Cotati Intertie Project (SCH # 93023038). The project involves construction, operation and maintenance of a Ranney-type collector well. Collector No. 6 consists of a vertical concrete caisson with horizontal perforated intake pipes installed in the underground river gravels to collect water. A pump house containing motors, pumps, and controls will be constructed on top of the caisson. The well will be capable of producing 16 to 22 million gallons of water per day. Appurtenances for Collector No. 6 may include connecting pipelines, access roads, electrical facilities, observation wells, telemetry equipment, and water treatment equipment. SCWA evaluated construction and operation of Collector No. 6 in its EIR prepared for the Water Supply and Transmission System Project (WSTSP EIR). The SCWA identified potentially significant impacts on earth, water, fisheries, noise, traffic, public services and utilities, energy, public health and safety, visual quality, recreation, and cultural resources. Mitigation measures have been incorporated into the project to avoid or reduce potential environmental effects identified in the EIR.
 - d. The State Water Board, as responsible agency, is required to consider (1) the Negative Declaration prepared by Camp Meeker Recreation and Park District; (2) the EIR prepared by the City of Healdsburg; and (3) the EIR prepared by SCWA, and reach its own conclusions on whether and how to approve the Petitions for Change of Permits 12947A, 12949, 12950, and 16596 by adding additional points of diversion and rediversion.
 - e. The State Water Board finds that changes or mitigation measures have been required in, or incorporated into, the project that avoid or substantially lessen the significant

environmental effects identified in the final Negative Declaration and the two Final EIRs prepared for the project. Mitigation measures for this project are within the responsibility of the Camp Meeker Recreation and Park District, the City of Healdsburg, and SCWA, not the State Water Board, and have been or should be adopted.

- f. SCWA's EIR found that the Collector No. 6 component of the WSTSP would cause potentially significant or significant and unavoidable impacts on biological resources, noise, visual quality, and recreation.
 - g. Construction of Collector No. 6 will result in removal of approximately 13 acres of riparian woodland and grassland. The project includes mitigation to reduce environmental impacts including (1) locating the project in an area to minimize impacts; (2) restoration of approximately 12.5 acres of disturbed land; and (3) replacement of all trees over four inches in diameter breast height at a ratio of 3:1. Impacts cannot be avoided entirely because Collector No. 6 must be located in its planned location in order to connect to SCWA's existing transmission system, and to access the alluvium along the Russian River. The project will, therefore, cause significant and unavoidable temporary impacts and potentially significant permanent unavoidable impacts to biological resources.
 - h. Construction of Collector No. 6 will require the use of heavy equipment that in turn will generate significant noise when equipment is running. Noise from equipment will be audible to nearby residences. Noise impacts will be mitigated by implementing restricted hours of operation and requirements to keep equipment in good mechanical condition. Noise impacts are temporary (only occurring during construction); nonetheless, construction activities may still result in potentially significant unavoidable noise-related impacts.
 - i. Construction of permanent structures will change the viewshed and result in potentially significant impacts to visual resources. Impacts to visual resources will be mitigated by (1) locating Collector No. 6 in a manner which will minimize impacts; (2) minimizing vegetation removal during construction; (3) implementing revegetation to provide screening; and (4) painting structures to blend in with surroundings. Even with the proposed mitigation, construction activities may still result in potentially significant unavoidable impacts to visual resources.
 - j. Construction of Collector No. 6 will disrupt recreational activities in and along the Russian River. Recreational users may be impacted by noise and increased human presence during construction. No mitigation measures have been identified that would reduce these impacts to a less than significant level. Therefore, construction activities may result in potentially significant unavoidable impacts to recreation.
 - k. SCWA found that mitigation measures would not reduce these effects to less than significant. Changes or alterations to the project that would avoid or substantially lessen these environmental effects are within the responsibility of the SCWA, not the State Water Board, and have been, or should be adopted.
7. The State Water Board, having reviewed and considered the information contained in the final Negative Declaration and the two Final EIRs prepared for the project, finds that no additional

mitigation measures within the responsibility of the State Water Board are available for the identified environmental impacts.

8. The social and economic need for the requested permit changes (i.e., petitions) outweighs the impacts described in SCWA's EIR. Therefore, on the basis of substantial evidence in the record and the findings set forth above, the State Water Board finds that the benefits of, and the need for, the project outweigh the significant environmental impacts.

NOW, THEREFORE, IT IS ORDERED:

1. The Division approves the petitions by SCWA to add points of diversion to Permits 12947A, 12949, 12950, and 16596 for Collector No. 6, the City of Healdsburg; and Camp Meeker Recreation and Park District. The following ties to the points of diversion/diversion are by California Coordinate System, Zone 2, NAD 1983:

Permits 12947A, 12949, 12950, and 16596

Collector No. 6 – North 1,951,063 and East 6,309,815
Camp Meeker Recreation and Park District – North 1,932,975 and East 6,272,896

Permits 12947A, 12949, and 12950

Healdsburg Fitch Well No. 1 – North 1,984,603 and East 6,317,057
Healdsburg Fitch Well No. 2 – North 1,984,629 and East 6,316,958
Healdsburg Guantlett Well No. 1 – North 1,993,475 and East 6,317,230
Healdsburg Guantlett Well No. 2 – North 1,993,581 and East 6,317,300
Healdsburg Guantlett Well No. 3 – North 1,993,517 and East 6,317,393
Healdsburg Guantlett Well No. 4 – North 1,993,594 and East 6,317,630

Permit 16596

Healdsburg Dry Creek Well No. 1 – North 1,982,134 and East 6,310,263
Healdsburg Dry Creek Well No. 2 – North 1,981,917 and East 6,311,300
Healdsburg Dry Creek Well No. 3 – North 1,982,331 and East 6,310,202
Healdsburg Dry Creek Well No. 4 – North 1,982,717 and East 6,309,960
Healdsburg Dry Creek Well No. 5 – North 1,983,213 and East 6,309,763

2. The following term shall be added to Permit 12947A:

Permittee shall comply with the following provisions that are derived from the agreement between permittee and downstream diverters executed on February 27 and 28, 2006 and filed with the State Water Resources Control Board:

The right to divert natural-flow water under this permit shall be junior in priority to the rights to divert natural-flow water under any valid riparian rights referenced in Statements of Water Diversion and Use 10480-10482 (Silverado Premium Properties, LLC) 10483-10485 (Ladbetter Farms), 14060 and 14926-14931 (Ferrari-Carano Vineyard and Winery) and 14090-14091 (River Bend Vineyards, LTD). The right to divert natural-flow water and imported water under this permit shall be junior in priority to the rights to divert natural-flow water and imported water under water

right License 3208 issued pursuant to Applications 10976 (River Bend Vineyards, LTD) and License 3647 issued pursuant to Application 12452 (Jeff Webber).

"Natural-flow water" means water that originates in the Russian River watershed and is not stored. "Natural-flow water" does not include any water that is imported into the Russian River watershed or any water that is stored in a reservoir and then subsequently released into the Russian River or any of its tributaries. "Imported water" means water that originates outside of the Russian River watershed and is diverted from some other watershed into the Russian River watershed. Nothing in this term shall be construed to authorize the diversion or redirection under any riparian right of any imported water or water released from storage. Nothing in this term shall be construed to authorize the diversion or redirection under any appropriate rights besides permittee's appropriate rights of any water released from storage.

3. The following term shall be added to Permits 12949 and 12950:

Permittee shall comply with the following provisions that are derived from the agreement between permittee and downstream diverters executed on February 27 and 28, 2006 and filed with the State Water Resources Control Board:

The right to divert natural-flow water under this permit shall be junior in priority to the rights to divert natural-flow water under any valid riparian rights referenced in Statements of Water Diversion and Use 10480-10482 (Silverado Premium Properties, LLC) 10483-10485 (Ledbetter Farms), 14060 and 14926-14931 (Ferrari-Carano Vineyard and Winery) and 14090-14091 (River Bend Vineyards, LTD). The right to divert natural-flow water and imported water under this permit shall be junior in priority to the rights to divert natural-flow water and imported water under water right License 3208 issued pursuant to Application 10976 (River Bend Vineyards, LTD); Licenses 3647, 4730, and 5455 issued pursuant to Applications 12452, 13393, and 14604 (Jeff Webber); and License 4867 issued pursuant to Application 13268 (Joe J. Rochioli, Jr.).

"Natural-flow water" means water that originates in the Russian River watershed and is not stored. "Natural-flow water" does not include any water that is imported into the Russian River watershed or any water that is stored in a reservoir and then subsequently released into the Russian River or any of its tributaries. "Imported water" means water that originates outside of the Russian River watershed and is diverted from some other watershed into the Russian River watershed. Nothing in this term shall be construed to authorize the diversion or redirection under any riparian right of any imported water or water released from storage. Nothing in this term shall be construed to authorize the diversion or redirection under any appropriate rights besides permittee's appropriate rights of any water released from storage.

4. The following term shall be added to Permit 16596:

Permittee shall comply with the following provisions that are derived from the agreement between permittee and downstream diverters executed on February 27 and 28, 2006 and filed with the State Water Resources Control Board:

The right to divert natural-flow water under this permit shall be junior in priority to the rights to divert natural-flow water under any valid riparian right referenced in Statements of Water Diversion and Use 10483-10485 (Ledbetter Farms), 14060 and 14926-14931 (Ferrari-Carrano Vineyard and Winery); and 14911 and 14922 (David C. Olson). The right to divert natural-flow water and imported water under this permit shall be junior in priority to the rights to divert natural-

flow water and imported water under Licenses 3956, 6095 and 6096 issued pursuant to Applications 13267, 13543, and 14333 (Ledbetter Farms), and License 6886 issued pursuant to Application 14762 (J. Wine Company).

"Natural-flow water" means water that originates in the Russian River watershed and is not stored. "Natural-flow water" does not include any water that is imported into the Russian River watershed or any water that is stored in a reservoir and then subsequently released into the Russian River or any of its tributaries. "Imported water" means water that originates outside of the Russian River watershed and is diverted from some other watershed into the Russian River watershed. Nothing in this term shall be construed to authorize the diversion or redirection under any riparian right of any imported water or water released from storage. Nothing in this term shall be construed to authorize the diversion or redirection under any appropriative rights besides permittee's appropriative rights of any water released from storage.

5. All other conditions of Permits 12947A, 12949, 12950, and 16596 are still applicable.

STATE WATER RESOURCES CONTROL BOARD

for James W. Kassel
Victoria A. Whitney, Chief
Division of Water Rights

Dated: **AUG 30 2006**

permit file
P12947A

STATE OF CALIFORNIA
CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY
STATE WATER RESOURCES CONTROL BOARD

DIVISION OF WATER RIGHTS

PERMIT FOR DIVERSION AND USE OF WATER

AMENDED PERMIT 12947A

Application 12919A of Sonoma County Water Agency
P. O. Box 11628
Santa Rosa, CA 95406

filed on January 28, 1949, has been approved by the State Water Resources Control Board (State Water Board) SUBJECT TO PRIOR RIGHTS and to the limitations and conditions of this permit.

Permittee is hereby authorized to divert and use water as follows:

1. Source of water

Source	Tributary to
East Fork Russian River	Russian River

within the Counties of Mendocino and Sonoma.

2. Location of point of diversion

By California Coordinate System of 1983 in Zone 2	North (ft)	East (ft)	40-acre sub-division of public land survey or projection thereof	Section (Projected)*	Township	Range	Base and Meridian

3. Purpose of use	4. Place of use	Section	Township	Range	Base and Meridian	Acres
Recreational Municipal Industrial Domestic Irrigation	At Lake Mendocino and within the service areas of the Sonoma County Water Agency, North Marin County Water District, Marin Municipal Water District, and Redwood Valley County Water District.					

The place of use is shown on a map dated October 12, 2005, on file with the State Water Board.

5. The water appropriated shall be limited to the water of the East Fork Russian River (EFRR), which can be beneficially used and shall not exceed 92 cubic feet per second (cfs) by direct diversion and 122,500 acre-feet per annum (afa) by storage to be diverted from January 1 to December 31 of each year. The maximum amount stored in Lake Mendocino under this permit shall not exceed 122,500 afa.

The maximum combined rate of direct diversion and rediversion of stored water under this permit, together with that under Permits 12949 and 12950 issued on Applications 15736 and 15737 shall not exceed 92 cfs.

additional RODs

Combined direct diversion and redirection of stored water under this permit shall be limited to the Wolher and Mirabel Park pumping facilities, and shall not exceed 92 cfs or a maximum amount of 37,544 acre feet (af) per water year of October 1 to September 30.

Withdrawals from storage under this permit for use in the service area of the Redwood Valley County Water District (RVCWD) shall not exceed 7,500 af per water year of October 1 to September 30.

(00000005)
(00000114)

6. The amount authorized for appropriation may be reduced in the license if investigation warrants.

(00000006)

7. Construction work shall be completed by December 1, 1995.

(00000008)

8. Complete application of the water to the authorized use shall be prosecuted with reasonable diligence and completed by December 1, 1999.

(00000009)

9. Progress reports shall be submitted promptly by permittee when requested by the State Water Board until license is issued.

(00000010)

10. Permittee shall allow representatives of the State Water Board and other parties as may be authorized from time to time by said Board, reasonable access to project works to determine compliance with the terms of this permit.

(00000011)

11. Pursuant to California Water Code sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of State Water Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the State Water Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the State Water Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the State Water Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the State Water Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest; and is necessary to preserve or restore the uses protected by the public trust.

(0000012)

12. The quantity of water diverted under this permit and under any license issued pursuant thereto is subject to modification by the State Water Board if, after notice to the permittee and an opportunity for hearing, the State Water Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the State Water Board finds that 1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges.

(0000013)

13. This permit does not authorize any act which results in the taking of a threatened or endangered species or any act which is now prohibited, or becomes prohibited in the future, under either the California Endangered Species Act (Fish and Game Code sections 2050 to 2097) or the federal Endangered Species Act (16 U.S.C.A. sections 1531 to 1544). If a "take" will result from any act authorized under this water right, the permittee shall obtain authorization for an incidental take prior to construction or operation of the project. Permittee shall be responsible for meeting all requirements of the applicable Endangered Species Act for the project authorized under this permit.

(0000014)

14. Permittee shall maintain records of the amount of water diverted and used to enable the State Water Board to determine the amount of water that has been applied to beneficial use pursuant to Water Code Section 1605.

(0000015)

15. This permit is subject to rights acquired or to be acquired pursuant to applications by others whether heretofore or hereafter filed for use of water within the service area of Mendocino County Russian River Flood Control (MCRRFC) and Water Conservation Improvement District (WCID) and within the Russian River Valley (RRV) in Sonoma County, as said valley is defined in Decision 1030 of the Division Water Rights (DWR) Board at Page 9, to the extent that water has been beneficially used continuously on the place described in said applications since prior to January 28, 1949 (the date of filing Applications 12919 and 12920).

(0000800)

16. This permit is subject to the stipulation between permittee and Potter Valley Irrigation District (PVID) dated August 18, 1959, and filed of record as Sonoma District Exhibit 13 at the hearing of Application 12919A and others.

(0000300)

17. This permit is subject to beneficial use in PVID whether under prior or subsequent rights, and to any and all rights of any county in which the water appropriated hereunder originates to the extent that any such water may be necessary for the development of lands in such county lying in the watershed above Lake Mendocino.

(0000800)

18. The State Water Board retains continuing jurisdiction for the purpose of conforming this permit to any agreement between Sonoma County Water Agency (SCWA) and MCRRFC and WCID whereby the Mendocino District will have an opportunity to acquire a greater portion of the Coyote Valley Project (CVP) and/or a share of any additional water above the minimum safe yield thereof, or upon failure to reach said agreement, as may be ordered by court of competent jurisdiction.

(0000600)

19. In compliance with Department of Fish and Game (DFG) Code Section 5943, permittee shall accord to the public, for the purpose of fishing, reasonable right of access to the waters impounded by Lake Mendocino during the open season for the taking of fish, subject to the regulations of the Fish and Game Commission.

(0480500)

20. For the protection of fish and wildlife, and for the maintenance of recreation in the Russian River, permittee shall pass through or release from storage at Lake Mendocino sufficient water to maintain:

- A. A continuous streamflow in the EFRR from Coyote Dam to its confluence with the Russian River of 25 cfs at all times.
- B. The following minimum flows in the Russian River between the EFRR and Dry Creek:

1. During normal water supply conditions when the combined water in storage, including dead storage, in Lake Pillsbury and Lake Mendocino on May 31 of any year exceeds 150,000 af or 90 percent of the estimated water supply storage capacity of the reservoirs, whichever is less:

From June 1 through August 31	185 cfs
From September 1 through March 31	150 cfs
From April 1 through May 31	185 cfs

2. During normal water supply conditions and when the combined water in storage, including dead storage, in Lake Pillsbury and Lake Mendocino on May 31 of any year is between 150,000 af or 90 percent of the estimated water supply storage capacity of the reservoirs, whichever is less, and 130,000 acre-feet or 80 percent of the estimated water supply storage capacity of the reservoirs, whichever is less:

From June 1 through March 31	150 cfs
From April 1 through May 31	185 cfs

If from October 1 through December 31,
Storage in Lake Mendocino is less than
30,000 acre-feet

75 cfs

3. During normal water supply conditions and when the combined water in storage, including dead storage, in Lake Pillsbury and Lake Mendocino on May 31 of any year is less than 130,000 af or 80 percent of the estimated water supply storage capacity of reservoirs, whichever is less:

From June 1 through December 31	75 cfs
From January 1 through March 31	150 cfs
From April 1 through May 31	185 cfs

4. During dry water supply conditions 75 cfs
5. During critical water supply conditions 25 cfs

C. The following minimum flows in the Russian River between its confluence with Dry Creek and the Pacific Ocean to the extent that such flows cannot be met by releases from storage at Lake Sonoma under Permit 16596 issued on Application 19351:

1. During normal water supply conditions 125 cfs
2. During dry water supply conditions 85 cfs
3. During critical water supply conditions 35 cfs

For the purposes of the requirements in this term, the following definitions shall apply:

1. Dry water supply conditions exist when cumulative inflow to Lake Pillsbury beginning on October 1 of each year is less than:

8,000 acre-feet as of January 1
39,200 acre-feet as of February 1
65,700 acre-feet as of March 1
114,500 acre-feet as of April 1
145,600 acre-feet as of May 1
160,000 acre-feet as of June 1

2. Critical water supply conditions exist when cumulative inflow to Lake Pillsbury beginning October 1 of each year is less than:

4,000 acre-feet as of January 1
20,000 acre-feet as of February 1
45,000 acre-feet as of March 1
50,000 acre-feet as of April 1
70,000 acre-feet as of May 1
75,000 acre-feet as of June 1

3. Normal water supply conditions exist in the absence of defined dry or critical water supply conditions.
4. The water supply condition designation for the months of July through December will be the same as the designation for the previous June. Water supply conditions for January through June shall be redetermined monthly.
5. Cumulative inflow to Lake Pillsbury is the calculated algebraic sum of releases from Lake Pillsbury, increases in the storage in Lake Pillsbury, and evaporation from Lake Pillsbury.

6. Estimated water supply storage space is the calculated reservoir volume below elevation 1,828.3 feet (ft.) in Lake Pillsbury and below elevation 749.0 ft. in Lake Mendocino. Both elevations refer to the National Geodetic Vertical Datum (NGVD) of 1929. The calculation shall use the most recent two reservoir volume surveys made by the U.S. Geological Survey (USGS), U.S. Army Corps of Engineers, or other responsible agency to determine the rate of sedimentation to be assumed from the date of the most recent reservoir volume survey.

(0140400)

21. Before making any change in the project determined by the State Water Board to be substantial, permittee shall submit such change to the Board for its approval in compliance with Water Code section 10504.5(a).

(0000600)

22. The right to export water from the RRV under this permit is subject to depletion by consumptive use of project water in the amount of 8,000 af per annum appropriated under Permit 12947B and depletion by diversion of project water not to exceed 10,000 afa appropriated under other permits, which may be issued for agricultural and domestic purposes within the RRV in Sonoma County for uses commencing after January 28, 1949.

(0000900)

23. Permittee shall release water from storage as required to meet the demands of junior appropriators not to exceed 10,000 afa, in RRV in Sonoma County, except to the extent that retention of stored water is necessary to insure satisfaction of the minimum streamflows required by permit.

(0000800)

24. The total rate and quantity of direct diversion and redirection of stored water at the Wohler and Mirabel Park pumping facilities under this permit, together with that directly diverted and redirected from storage under Permits 12949, 12950, and 16596, issued on Applications 15736, 15737, and 19351, shall not exceed 180 cfs and 75,000 af per water year of October 1 to September 30.

(0000114)

25. Withdrawals from storage under this permit for use within the service area of the RVCWD shall be subject to the following restrictions:

- A. Said withdrawals shall be discontinued whenever cumulative inflow to Lake Pillsbury during the current water year is less than 50,000 af on April 1 or less than 90,000 af on May 1. Withdrawals shall not resume until storage in Lake Mendocino rises to more than 30,000 af subsequent to October 31 after having fallen below that level, or until permittee has projected, to the satisfaction of the Chief, DWR, that storage at Lake Mendocino will not fall below 30,000 af.
- B. Said withdrawals, if not already discontinued under condition (a) above, shall be restricted to a monthly quantity no greater than fifty percent of the average monthly use in the service area of the RVCWD during the same month of the previous three years; whenever storage in Lake Mendocino is below 30,000 af.

26. Any agreement between permittee and the RVCWD for withdrawals from storage at Lake Mendocino under this permit shall be subject to discontinuation, curtailment, or special conditions

placed on said withdrawals pursuant to this permit, as this permit is now or may be amended in the future. A copy of any such contract shall be submitted to the State Water Board.

(0000300)

27. The State Water Board reserves jurisdiction over this permit to modify, delete, or impose additional conditions concerning the withdrawal of storage from Lake Mendocino for use within the service area of the RVCWD. Action by the State Water Board will be taken only after notice to interested parties and opportunity for hearing.

(0000600)

28. Permittee shall collect and maintain average daily flow data for the following USGS streamflow gaging stations:

Potter Valley Powerhouse Tailrace
East Fork Russian River near Ukiah
Russian River near Ukiah
The summation of the above two (flow at the Forks)
Russian River near Hopland
Russian River near Cloverdale
Russian River near Healdsburg
Russian River near Guerneville

In addition, permittee shall collect and maintain daily data on the quantity of water pumped at its Wohler and Mirabel Park facilities, including water pumped to offstream settling ponds, the Healdsburg well fields, the Camp Meeker Recreation and Park District, and on the operation of Lake Mendocino including the calculated quantities of inflow, discharge, change in lake volume, lake evaporation, precipitation on the lake if not included in inflow, direct diversion by RVCWD, and withdrawals from storage for use in Redwood Valley.

Requirements for collection and maintenance of streamflow and operational data under this permit are subject to modification, deletion, or replacement by other requirements as ordered by the Chief, DWR.

(0090400)

29. Permittee shall consult with the DWR and, within one year from September 18, 1986, develop a plan, satisfactory to the Chief, DWR, for submittal of data to the State Water Board on the quantities of direct diversion and rediversion of stored water beneficially used under this permit.

(0490400)

30. Permittee shall consult with the DWR and develop and implement a water conservation plan or actions for the service area of the RVCWD. The proposed plan or action shall be presented to the State Water Board for approval within one year from the execution of an agreement to deliver water to the service area of RVCWD or such further time as may, for good cause shown, be allowed by the Board. A progress report on the development of a water conservation program may be required by the State Water Board at any time within this period.

All cost effective measures identified in the water conservation program shall be implemented in accordance with the schedule for implementation found therein.

(0416500)

31. The State Water Board reserves jurisdiction over this permit to modify, delete, or add minimum flow requirements or related criteria for the protection of fish and wildlife and the maintenance of recreation in the Russian River should (1) additional fishery studies be conducted in the Russian River, (2) unforeseen adverse impacts occur to the fishery or recreation in the Russian River, or (3) final administrative or judicial action result in modified minimum flow requirements in the Eel River.

Action by the State Water Board will be taken only after notice to interested parties and opportunity for hearing.

(0000600)

32. Permittee shall comply with the following provisions that are derived from the agreement between permittee and downstream diverters executed on February 27 and 28, 2006 and filed with the State Water Resources Control Board:

The right to divert natural-flow water under this permit shall be junior in priority to the rights to divert natural-flow water under any valid riparian rights referenced in Statements of Water Diversion and Use 10480-10482 (Silverado Premium Properties, LLC) 10483-10485 (Ledbetter Farms), 14060 and 14926-14931 (Ferrari-Carano Vineyard and Winery) and 14090-14091 (River Bend Vineyards, LTD). The right to divert natural-flow water and imported water under this permit shall be junior in priority to the rights to divert natural-flow water and imported water under water right License 3208 issued pursuant to Applications 10976 (River Bend Vineyards, LTD) and License 3647 issued pursuant to Application 12452 (Jeff Webber).

"Natural-flow water" means water that originates in the Russian River watershed and is not stored. "Natural-flow water" does not include any water that is imported into the Russian River watershed or any water that is stored in a reservoir and then subsequently released into the Russian River or any of its tributaries. "Imported water" means water that originates outside of the Russian River watershed and is diverted from some other watershed into the Russian River watershed. Nothing in this term shall be construed to authorize the diversion or redirection under any riparian right of any imported water or water released from storage. Nothing in this term shall be construed to authorize the diversion or redirection under any appropriative rights besides permittee's appropriative rights of any water released from storage.

(0160300)

This permit is issued and permittee takes it subject to the following provisions of the Water Code:

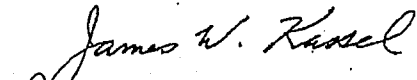

Section 1390. A permit shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer.

Section 1391. Every permit shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a permit is issued takes it subject to the conditions therein expressed.

Section 1392. Every permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any permittee or by the holder of any rights granted or acquired under the provisions of this division (of the Water

Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any permittee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

STATE WATER RESOURCES CONTROL BOARD

Victoria A. Whitney, Chief
Division of Water Rights

Dated: **AUG 30 2006**
